

## LASSENITE NON-TURF APPLICATION GUIDELINES

### **For Potting Soil**

Mix 1 part **Lassenite** to 4 parts soil. Plant as usual. For existing plants, spread 1/8 inch (3 mm) **Lassenite** and scratch into surface of soil. Water thoroughly. Reduce future watering as needed to avoid over watering.

### **Shrubs (5-15 Gallon)**

Trench (circular) 18-24 inches (45-60 cm.) away from shrubs, 6 inches (15 cm) wide by 20 inches (50 cm.) deep. Mix **organic** matter and **Lassenite** approximately 4 to 1. Apply to trench, leaving a 4 inch (10 cm.) well for water. Apply 10-20 gal (45-90 litres) of water to trench, let recede then repeat. Water as needed.

### **Ornamentals and Shade Trees**

Trench (square) 3 ft. (1 metre from tree 12 inches (30 cm.) wide and 30 inches (75 cm.) deep. Mix 100 lbs. (45 kgs) of **Lassenite** with 200 lbs. (90 kgs.) of organic matter and apply to trench. Leave 4 inch (10 cm.) well for water. Apply 25 gal (115 litres) of water to well, let recede and repeat 2 times. Water as needed.

### **Seasonal and Ground Covers**

For new planting, till with a crisscross pattern 3 inches (8 cms.) deep. Apply **Lassenite** by spreading product at the rate of ½ lb. per ft<sup>2</sup> (2.2 kilos per M<sup>2</sup>) over area before you plant. In established planted areas spread on surface, work in lightly with rake. Water thoroughly.

### **Garden Soil**

Mix 1 part **Lassenite** to 4 parts soil

### **Dust Control**

Lassenite ATS is a perfect to control dust and reduce compaction in applications such as equestrian arenas, rodeo grounds and livestock yards. For optimum results mix 10- 20% by volume in the top 4 to 6 inches of the soil.

### **Bonsai**

Lassenite is available in four different sizes specifically for bonsai mediums.

### **Orchids, Roses and other specialty applications.**

Lassenite is available in custom blends for special applications. Contact your local dealer for specifics.

**Apply only during dry weather.**
